Annual accessibility report 2025

This report summarises how Northwind Public Services made its documents accessible during 2025. It covers the publishing process, the results of our audits and the plan for next year. Full methodology is available at example.org/methodology.

1. Context

Public bodies must publish documents that everyone can read, including people who use screen readers, magnifiers or braille displays. In 2025 we reviewed every template used by our teams and trained the authors who produce them. Public bodies must publish documents that everyone can read, including people who use screen readers, magnifiers or braille displays. In 2025 we reviewed every template used by our teams and trained the authors who produce them.

1.1 Goals

- Tag every new PDF before publication
- Give every image a text alternative
- Check colour contrast on all templates

1.2 Steps we followed

1. Inventory of templates
2. Training of 140 authors
3. Automated and manual audits
4. Publication of the results

2. Results

The table below shows audit results per department.

Department	Documents audited	Pass rate
Housing	412	87 %
Transport	268	91 %

Health	530	78 %

3. Next steps

Next year we will extend the programme to forms and to scanned archives, which need optical character recognition before they can be tagged. Contact accessibility@example.org for questions. Next year we will extend the programme to forms and to scanned archives, which need optical character recognition before they can be tagged. Contact accessibility@example.org for questions.
